

```
# Feature → Simple runnable unittest generation

{
    "role": "user",
    "content": f"""Generate a unittest test script
for the following Python function.
```

The script should fully test the function and be runnable directly.

```
### Output Formatting
1. Start with: import unittest
2. Include: from {module_name} import {function_name}
3. End with:
if __name__ == '__main__':
    unittest.main()
```

Function:

```
{code_content}
"""
}
```
